To whom it may concern,

This letter is long overdue. The association Simmons College has had with the Principals of Communications Design Associates has been ongoing since 1995. They have been with us through the first infusion of presentation technology in our electronic classrooms, through the design and building of the Crestron Media Retrieval System, and now with the design and installation of technology in the new Graduate Center building.

Recognizing that I and my staff did not know all there is to know about technology, did not have the resources to design and blueprint, we called upon CDA to lead us, to guide us and to, in some cases, to defend us. They have done all that and more. They have opened educational vistas for my staff, Simmons College and the students who learn here.

I and my staff are indebted to Stewart, Bob, Jim and Greg for their knowledge, their creativity and resourcefulness. It is rare to find a group of people so well suited to their jobs and willing to share what they know for the benefit of education.

I would not hesitate to recommend this firm for any challenge in technology or facility design

Respectfully,

Bernard Colo
